GROUP ASSIGNMENT

LEVEL 4

COMP40004:

WEB DEVELOPMENT AND OPERATING SYSTEMS II

Hand Out Date: 7th July 2024

Hand In Date: 9th August 2024

CB Number: CB008920

INSTRUCTION TO CANDIDATES

- 1. Students are advised to comply referencing with Harvard Referencing Style. Preferably, use Mendeley or EndNote.**
- 2. Late submission will be awarded zero (0) unless extenuating circumstances (EC) are upheld.**
- 3. Cases of plagiarism will be penalized.**
- 4. The assignment should be submitted as softcopy via LMS**

Introduction

This report is to present the overview of the website I developed, designed to provide a user-friendly and functional platform for “Groceries Supermarket”. The primary objective of this assignment is to create a responsive and functional website using HTML, CSS and JavaScript.

I conducted HTML validation, CSS validation, WAVE and lighthouse tests. The results of these tests are included in this report. The report also has activity diagrams illustrating the functionality of each JavaScript function and details about the test cases and their status.

Table of Contents

1. HTML Validation
2. CSS Validation
3. WAVE Testing
4. Lighthouse Testing
5. Activity Diagrams
6. Functional Test
7. Responsiveness Testing
8. Conclusion

3. WAVE Testing

1. Home Page

The following apply to the entire page:

The WAVE tool interface shows the results for the Home Page of Groceries Supermarket. The summary panel indicates 10 Errors, 5 Alerts, 19 Features, 55 Structural Elements, and 0 ARIA issues. The main content area displays the supermarket's homepage with various icons and text. A green callout box highlights an 'h1' heading with the text "Delivering Excellence, Ensuring Quality - Every Product, Every Time." Another green callout box highlights a 'Code' button at the bottom of the page.

2. Order Page

The following apply to the entire page:

The WAVE tool interface shows the results for the Order Page of Groceries Supermarket. The summary panel indicates 16 Errors, 4 Alerts, 6 Features, 25 Structural Elements, and 0 ARIA issues. The main content area displays the supermarket's order page with sections for 'Orders', 'Vegetables', and 'Dairy Products'. A green callout box highlights an 'h1' heading with the text "Orders". Another green callout box highlights a 'Code' button at the bottom of the page.

3. Register Page

The following apply to the entire page:

The screenshot shows the WAVE web accessibility evaluation tool interface. On the left, there's a summary panel with various accessibility metrics. On the right, the actual website content is displayed. The website has a dark blue header with navigation links: Home, Products, Orders, Register, and About. Below the header, there's a welcome message for the registration page. A large teal-colored modal window is open, titled "Registration Form". Inside the modal, there are fields for "User Info" and a "Code" section. A "scroll up" button is visible on the right side of the modal.

1. Home Page

The screenshot shows the PageSpeed Insights report for the Home Page. The top navigation includes a back arrow, a refresh button, and tabs for Mobile and Desktop, with Desktop selected. A checkbox for "Diagnose performance issues" is checked. The main dashboard displays four scores: Performance (75), Accessibility (87), Best Practices (96), and SEO (91). Below the scores, there's a large circular "Performance" score of 75. A note states: "Values are estimated and may vary. The performance score is calculated directly from these metrics. See calculator." A legend indicates that the score range is 0-49 (red), 50-89 (orange), and 90-100 (green). To the right, a screenshot of the website homepage is shown, featuring a banner with "Delivering Excellence. Getting Quality. Every Product. Every Time." and a list of product categories. A "Expand view" link is at the bottom right of the screenshot.

6. Functional Tests

1.

| A | B | C | D | E | F | G | H |
|------------|-------------------------|--|---------------------------------------|--|----------------------------|--|-----------|
| TestcaseID | Category | Description | Prerequisites | Test Procedure | Input Data | Expected Results | Pass/Fail |
| 1 | Add items to the table. | 1.Select items you want from the product categories. Give an amount. Submit. | Selecting an item and give an amount. | 1. Get the item name and amount(eg: vegetable.value, vegetableAmount.value). If the item and the amount are selected, first get the price per kilogram or a unit using the "getPrice" function. Then multiply it by the amount. When the item name and the relevant object are passed as parameters to the getPrice function it use the item name as the key and get the value of that key from the object. 2. Then pass the item name, amount and price to the "createRow" function as parameters. This function will add the parameters as text content to the created cells and append those cells to the row returning that row. 3. Then append that created row to the table. Finally, every time the item price will be added to the total price variable and add it to the first row of the table. | Product: Carrot, Amount: 1 | Item, amount and the price should be successfully added to the table. And show the total price should be added to the first row. | PASS |
| 2 | Buy now | 1. Direct to the pay page (with all the orders). | NONE | 1. Read all the rows except first(table header) and second(total price). Get text content of each row then store the first cell's text content as product, the second cell's text content as amount and the last cell's text content as the price. 2. Then push these three to an object and store all rows in an array. Then convert the array to a JSON string and store it in the local storage. 3. Finally get the total price and do the same then direct to the pay page (function is "getorderDetails"). On the pay page get the order details from local storage as java script object. If the order details are not null for each object in the array, create a paragraph and give the product, amount and price (eg: object is X, X.product is the product name). else show no orders. Do the same to the total price. | N/A | Should direct to the pay page and show the orders and the total. If no orders should ask to order products. | PASS |

2.

| A | B | C | D | E | F | G | H |
|---|------------------|--|--|---|--|---|------|
| 3 | Add to favourite | 1. Save the orders in the table as favorite | Should have orders in the table. | 1. Use the same method to get and store the table orders. (Read all the row except the first and the second, get each row cell details and store them in an object, store those objects in an array) 2. Save order details and total price as a JSON string using a different key name. | Orders in the table. | Should save every order in the table in local storage. | PASS |
| 4 | Apply favourite | 1. Apply previous saved order as a favorite. | Should have a saved favorite. | 1. Get the save favorite from the local storage and parse it as a JSON object to make the work easy. Save it in a variable. 2. Get the total price and give that value to the 'totalP' variable unless you can't show the total on pay page. 3. For each order(object) in the "orderDetails" array, get the three values using the keys(product, amount and price / keys are order.product, order.amount and order.price). Pass these value to the "createRow" function and get the table row. 4. Append those row to the table. Update the total. | N/A | Should fill the order table using the saved favorite orders from the local storage. | PASS |
| 5 | Paying order | 1. Get customer details and payment details. Shows current order details. Delivery date and Thank. | Customer details, payment (card) details | 1. Show the order details and the total Price. If no orders prompt the user to order something. 2. "thank" function check if user has filled all the fields in the form. If not, prompt user to fill the form completely. 3. Get the ordering date and calculate the delivery date. 4. Show the name, address, Order date and the delivery date. | Customer details like name, address, phone number and email. Payment details like card number, security code, card holder name, and expire date. | Should check all the form's are filled. Then give the delivery date and thank. | PASS |

7. Responsiveness Testing

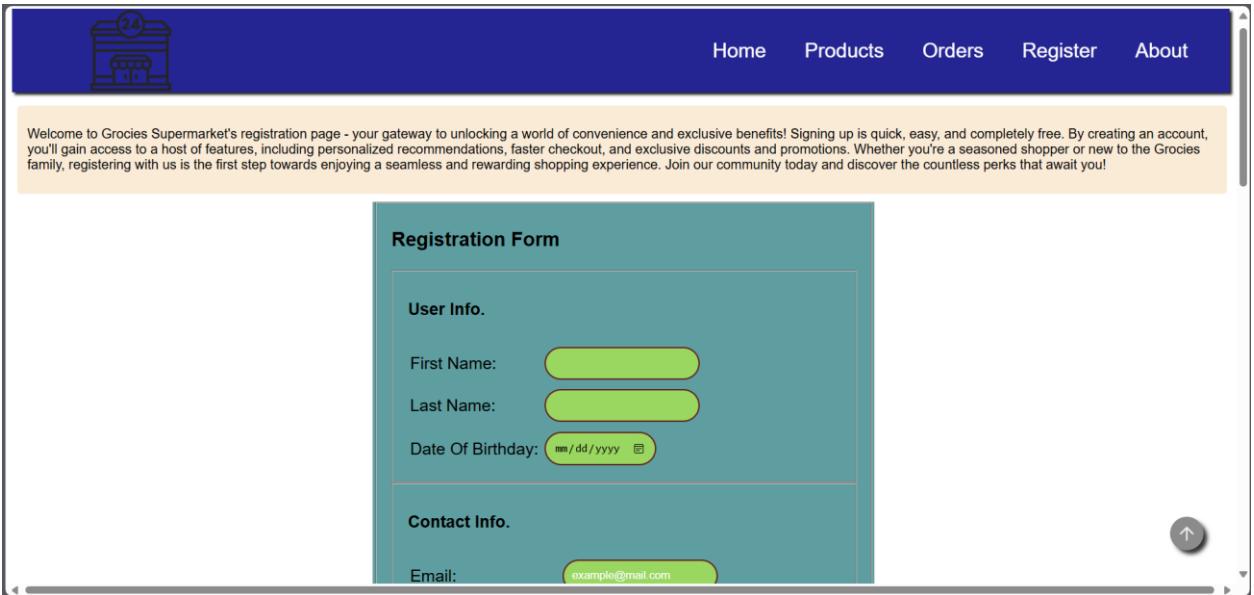

1. Home Page – Desktop

The screenshot shows the desktop version of the Groceries Supermarket website. At the top is a dark blue header bar with a logo of a building with a '24' sign, followed by navigation links: Home, Products, Orders, Register, and About. Below the header is a search bar with a placeholder 'Search here' and a magnifying glass icon. A large banner image features the text: "Delivering Excellence, Ensuring Quality - Every Product, Every Time." Below the banner, a welcome message from the supermarket is displayed, followed by a list of categories: Vegetables, Dairy products, and Baking & Cooking. The page has a clean, modern design with a light gray background.

2. Order Page – Desktop

The screenshot shows the desktop version of the Groceries Supermarket Order Page. The top navigation bar is identical to the Home Page. The main content area is titled 'Orders' and contains a welcome message about the ease of ordering. Below this are six input fields arranged in a 2x3 grid. The first row contains 'Vegetables' (Product: dropdown, Amount: input), 'Dairy Products' (Product: dropdown, Amount (1 Unit): input), and 'Baking And Cooking' (Products: dropdown, Amount (1 Unit): input). The second row contains 'Meats' (Product: dropdown), 'Fruits' (Product: dropdown), and 'Skin Care Products' (Products: dropdown). The page uses a light blue background for the main content area.

6. Vegetables Page – Desktop

The screenshot shows the Vegetables section of the website. At the top, there's a blue header bar with a logo on the left and navigation links: Home, Products, Orders, Register, and About. Below the header, a grey navigation bar contains links for Vegetables, Dairy, Baking and Cooking Ingredients, Meats, Fruits, and Skin-Care. A search bar with a magnifying glass icon is also present.

Vegetables

Welcome to Groceries Supermarket's Vegetable Oasis. Dive into our vibrant selection of farm-fresh produce, carefully curated to inspire your culinary creations. From crunchy greens to colorful peppers, succulent tomatoes to exotic root vegetables, we have everything you need to add a healthy and flavorful touch to your meals. Our Vegetable section is your go-to destination for quality ingredients that will elevate your dishes to new heights. Explore our aisles today and discover the joy of cooking with the freshest vegetables at Groceries Supermarket!

Here are our main venues there we buy vegetables for you

- Dambulla Dedicated Economic Centre (DDEC): Located in the central part of Sri Lanka, Dambulla Dedicated Economic Centre is one of the largest wholesale vegetable markets in the country. It serves as a hub for farmers from various regions to sell their produce to retailers and distributors. Visitors to DDEC can find a wide variety of fresh vegetables sourced directly from local farms.
- Pettah Manning Market, Colombo: Situated in the heart of Colombo, Pettah Manning Market is a bustling market known for its vibrant atmosphere and diverse array of goods. Here, vendors offer a wide selection of fruits and vegetables, sourced from both local farmers and imported sources. With its central location and accessibility, Pettah Manning Market is a popular destination for both wholesale buyers and individual shoppers looking for fresh produce.

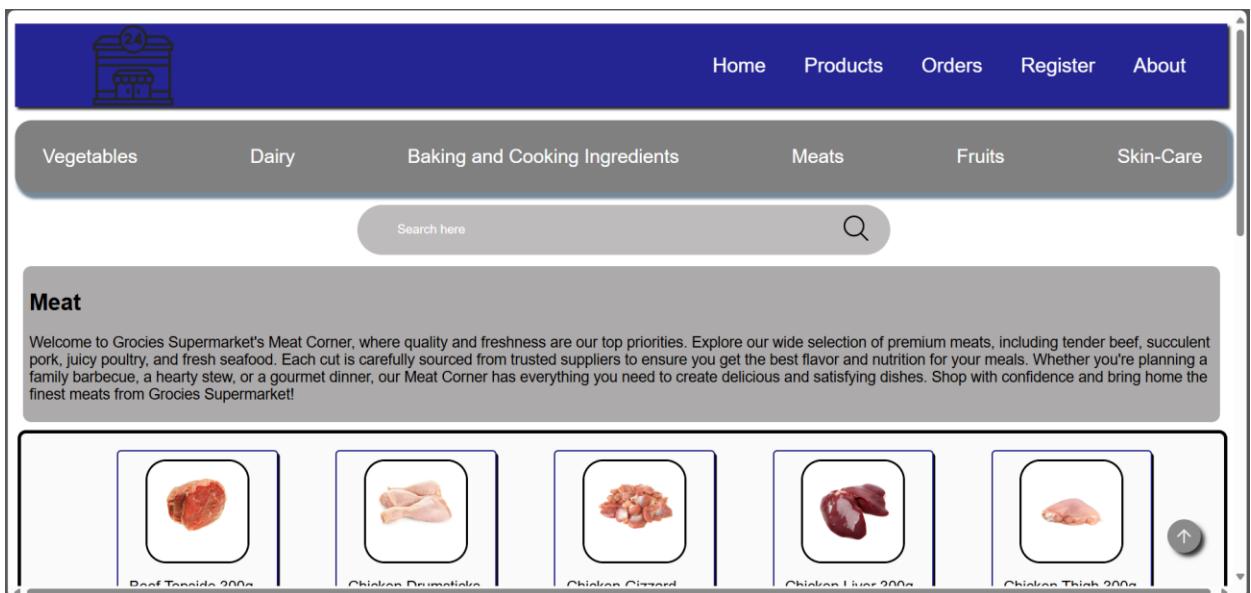

7. Dairy Page – Desktop

The screenshot shows a desktop view of a supermarket website. At the top is a dark blue header bar with a small storefront icon on the left. To the right are five white links: Home, Products, Orders, Register, and About. Below the header is a grey navigation bar with six categories: Vegetables, Dairy, Baking and Cooking Ingredients, Meats, Fruits, and Skin-Care. A search bar with a placeholder 'Search here' and a magnifying glass icon is centered below the navigation bar. The main content area has a light blue background and features a section titled 'Dairy Products'. It contains a paragraph of text welcoming visitors to the dairy products page and encouraging them to explore various items like cheeses, yogurt, and spreads. Below this text is a grid of six product thumbnails, each with a small downward arrow in the bottom right corner. The thumbnails represent different dairy products, including a green circular container, a blue triangular container, a green circular container with a cartoon character, a white bottle with a brown cap, and a white tub with a blue lid.

8. Baking And Cooking Ingredients Page – Desktop

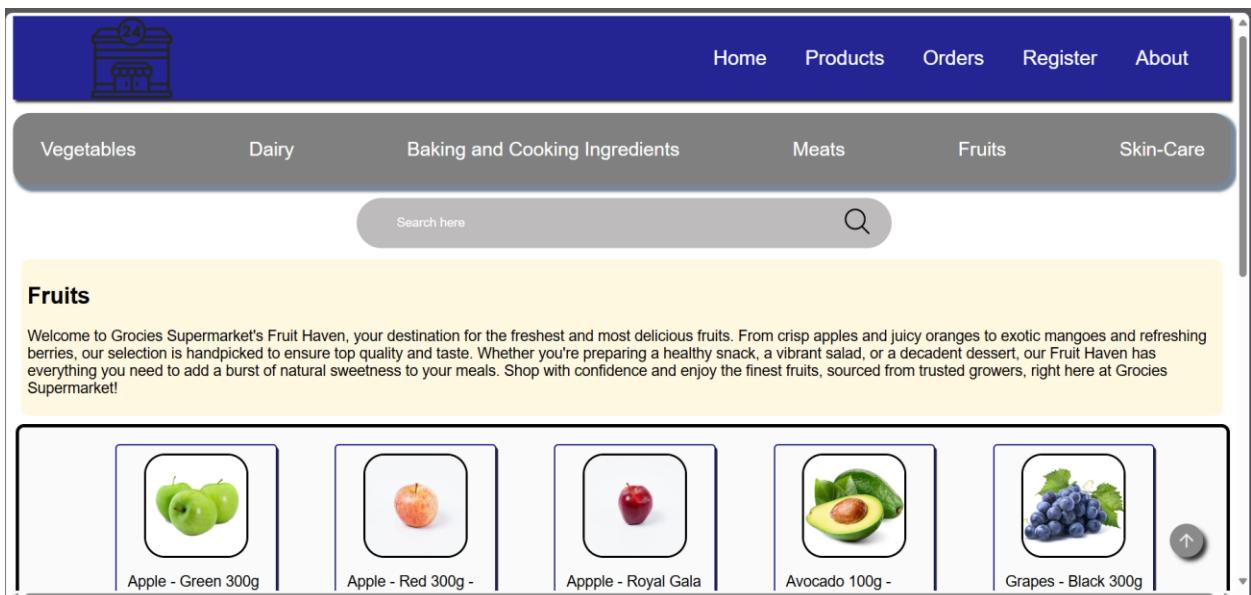

The screenshot shows a desktop view of a supermarket website. The layout is identical to the previous screenshot, with a dark blue header, a grey navigation bar, and a light blue main content area. The main content area features a section titled 'Baking And Cooking Products'. It includes a paragraph of text about the baking and cooking ingredients section, highlighting the wide range of high-quality ingredients available. Below this text is a grid of five product thumbnails, each with a small downward arrow in the bottom right corner. The thumbnails represent various ingredients: a bottle of Edinborough B.B.Q sauce, a small bottle of Edinborough, a bottle of Marina Cooking Oil, a bag of Mauripan Instant yeast, and a bag of Rayin White String cheese.

9. Meats page – Desktop

The screenshot shows the 'Meats' section of the Groceries Supermarket website. At the top, there's a blue header bar with a 24-hour service icon and navigation links for Home, Products, Orders, Register, and About. Below the header is a grey navigation bar with categories: Vegetables, Dairy, Baking and Cooking Ingredients, Meats (which is highlighted in blue), Fruits, and Skin-Care. A search bar with a magnifying glass icon is positioned below the navigation bar. The main content area has a grey background and features a heading 'Meat'. Below it is a paragraph of text: 'Welcome to Groceries Supermarket's Meat Corner, where quality and freshness are our top priorities. Explore our wide selection of premium meats, including tender beef, succulent pork, juicy poultry, and fresh seafood. Each cut is carefully sourced from trusted suppliers to ensure you get the best flavor and nutrition for your meals. Whether you're planning a family barbecue, a hearty stew, or a gourmet dinner, our Meat Corner has everything you need to create delicious and satisfying dishes. Shop with confidence and bring home the finest meats from Groceries Supermarket!' Below the text is a grid of five meat products, each with an image and a caption: Beef Topsides 300g, Chicken Drumsticks, Chicken Gizzard, Chicken Liver 300g, and Chicken Thigh 300g. There are also navigation arrows at the bottom right of the grid.

10. Fruits Page – Desktop

The screenshot shows the 'Fruits' section of the Groceries Supermarket website. It has the same blue header bar with a 24-hour service icon and navigation links for Home, Products, Orders, Register, and About. Below the header is a grey navigation bar with categories: Vegetables, Dairy, Baking and Cooking Ingredients, Meats, Fruits (which is highlighted in blue), and Skin-Care. A search bar with a magnifying glass icon is positioned below the navigation bar. The main content area has a yellow background and features a heading 'Fruits'. Below it is a paragraph of text: 'Welcome to Groceries Supermarket's Fruit Haven, your destination for the freshest and most delicious fruits. From crisp apples and juicy oranges to exotic mangoes and refreshing berries, our selection is handpicked to ensure top quality and taste. Whether you're preparing a healthy snack, a vibrant salad, or a decadent dessert, our Fruit Haven has everything you need to add a burst of natural sweetness to your meals. Shop with confidence and enjoy the finest fruits, sourced from trusted growers, right here at Groceries Supermarket!' Below the text is a grid of five fruit products, each with an image and a caption: Apple - Green 300g, Apple - Red 300g -, Appple - Royal Gala, Avocado 100g -, and Grapes - Black 300g. There are also navigation arrows at the bottom right of the grid.

11. Skin – Care Page – Desktop

The screenshot shows a desktop view of the Groceries Supermarket website's skincare section. At the top is a dark blue header bar with a logo of a supermarket building containing a '24' icon. To the right are navigation links: Home, Products, Orders, Register, and About. Below the header is a grey navigation bar with categories: Vegetables, Dairy, Baking and Cooking Ingredients, Meats, Fruits, and Skin-Care. A search bar with the placeholder 'Search here' and a magnifying glass icon is centered below the navigation bar. The main content area has a light orange background and features a heading 'Skin Care Products'. Below this is a descriptive paragraph about the skincare collection. Two product cards are displayed side-by-side: 'Aurica Alovera Face Wash - Rs.400/= ' with an image of a green tube and 'Aurica Neem Face Wash - Rs.410/= ' with an image of a similar green tube. A scroll bar at the bottom indicates more content is available.

1.1. Home Page – Mobile

The screenshot shows a mobile phone displaying the Groceries Supermarket homepage. At the top is a dark blue header bar with a logo of a supermarket building containing a '24' icon and a three-line menu icon. Below the header is a search bar with the placeholder 'Search here' and a magnifying glass icon. The main content area features a large, semi-transparent call-to-action box with the text: "Delivering Excellence, Ensuring Quality - Every Product, Every Time." Below this, there is a welcome message: "Welcome to Groceries Supermarket, your friendly grocery store in Sri Lanka! With over 20 years of experience, we're dedicated to serving our community with top-notch products and services. We have everything you need ensuring you have access to quality items every time you shop with us." A small circular arrow icon is visible near the bottom right of the message box.

1.2. Order Page – Mobile

The image shows a mobile application interface for an order page. At the top, there is a blue header bar featuring a stylized building icon with a '24' above it and a three-line menu icon on the right. Below the header, the word 'Orders' is displayed in large, bold, white letters. A descriptive paragraph in white text on a dark purple background explains the service, mentioning a wide range of products, simple categories, a search bar, and secure payment options. Below this section, there is a rounded rectangular input form with a white background. The title 'Vegetables' is centered at the top of this form in a large, bold, black font. To the left of the title, the word 'Product:' is followed by a dropdown menu with a downward arrow. To the right of the title, there is a circular button with an upward-pointing arrow. Below the product selection, the word 'Amout:' is followed by an input field.

Orders

8. Conclusion

This website is a user-friendly platform featuring a well-structured main and mini navigation bar that helps users to find what they need. The introductions provide valuable information about the product categories. Mobile users also can visit the website because of the responsiveness of the web pages. Users can submit their orders, buy the order and complete the checkout process. Users can view their order details and the total price. Additionally, they can save their order if they want and apply that order at any time. There were some challenges that I had to face. The first one is creating the table when user select an item and the amount. I took the product name and the amount. Then got the price for that amount using a function that gives the price of a unit/ kilogram. Finally, use a function that creates table rows that include the product name, amount, and the price. These rows were then appended to the table to display the orders. The second challenge was getting only the selected products and their corresponding amounts to create the table and ignore empty fields upon submission. I check if the input field for the product and amount has values. If both fields had values, use these values to create the rows. The third challenge was sending the order table's details to the payment page and showing the orders and the total price. I got the details (product name, amount, price) from each row of the order table. Then created objects which have those details and pushed them to an array. Finally, used those objects and showed the orders and the total price on the pay page. I used the same method to create users' favorite order. Then used object's product name, amount and price to create rows of the order table when user wants to use his favorite order.

I learned many things about JavaScript such as how to create and manipulate HTML elements, store data (order details) in the local storage, when to use objects/ arrays, why I should “JSON.stringify” objects if I want to use them effectively later.

Finally, all the functions work well and completed the all the assignment's requirements.
